 Sao Paulo - Brazil

## About Me

Frontend engineer passionate about learning and teaching. I strive to build accessible, scalable, and visually appealing applications while supporting the growth of fellow developers—regardless of their seniority

## Skills

- React.
- Typescript
- UI engineering
- Web Performance
- Next
- Familiar with GCP and AWS

## Education

- Technology in Information System  
*Faculdade de Tecnologia de Bragança Paulista* 2018-2020

## Experience

- **Software Engineer**  
*Globo* April 2023 – Present  
Globo is the largest media and television company in Latin America.  
  
During my tenure, I:
  - Developed AI-integrated interfaces for content production and distribution.
  - Built microservices for large-scale applications.
  - Maintained, engineered, and provisioned systems for critical event coverage, including: Brazilian municipal elections, The Olympics and Big Brother Brazil.
- **Mid-Level Software Engineer**  
*CI&T* July 2021 – March 2023  
CI&T is a global consultancy with clients including: Cielo, Google, HP, Itaú, Johnson & Johnson, Motorola, and Globo.  
  
During my time there, I:
  - Developed the content distribution system for Globo.com (Brazil's 3rd most-visited website)
  - Designed a microservices architecture integrated with accessible, reusable components
  - Led the migration of Memória Globo and História Globo websites to Globo's internal system using web scraping techniques
- **Front-End Developer**  
*agendaOS* November 2019 – July 2021
  - Developed and maintained agendaOS web platform using React.js and Redux.
  - Contributed to the initial development of the mobile application with React Native.

## Languages

- English: Full Professional Proficiency
- Portuguese: Native
